Jake: We always defer to the states on this as most have some sort of backfill criteria, but from purely analytical standpoint this is fine under RCRA.

**Subject:** Momentive

Luis,  
John Garner called me yesterday on my way home, with his contractor. They asked me if they could use the soil they were excavating for fill material onsite. They have tested the material (TCLP and PCBs) and the results have been ND for PCBs and pass TCLP. I do not see a problem with this, but wanted to make sure, under RCRA CA, this is allowable.  
Thanks

Jason (Jake) McDougal
